WORK EXPERIENCE (8 YEARS)

System Analyst

Hexaware Technologies

09/2022 - Present

Chennai, India

Technologies used: ReactJS, Redux, NodeJs, Javascript, html, css

Achievements/Tasks

- Leading a team of full-stack developers, overseeing project delivery and technical excellence
- Designed and developed **scalable and high-performance web applications** using Node.js, Express.js, ReactJs and a variety of databases (e.g., MongoDB, PostgreSQL) with a focus on clean code, maintainability, and best practices.
- Successfully implemented and maintained **RESTful APIs**, integrated with third-party services, and deployed applications to cloud platforms (e.g., AWS, Azure) with a strong emphasis on security and performance optimization.
- Effectively enhanced the website by incorporating new features and **optimizing code**, resulting in **20% reduction** in code duplicates and **10% increase in overall code coverage**.

Senior Application Engineer

Oracle India Pvt Ltd

05/2021 - 08/2022

Bangalore, India

Technologies used: ReactJS, Redux, NodeJs, Javascript, html, css

Achievements/Tasks

- Developed optimized, responsive front-end applications from inception to completion, effectively integrating with backend APIs and collaborating seamlessly with cross-functional teams.
- Developed and deployed scalable, user-friendly **B2B e-commerce** platforms, aligning with customer requirements and business objectives.

Senior Project Engineer

Wipro Ltd

07/2016 - 05/2021

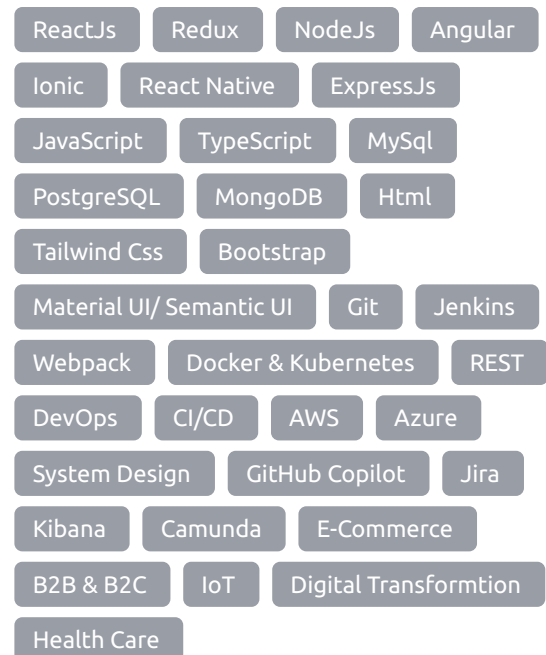

Bangalore, India

Technologies used: ReactJS, Redux, Angular, NodeJs, MongoDB, MySQL, Javascript, Typescript

Achievements/Tasks

- Developed a fully responsive website** optimizing performance and ensuring a seamless user experience across all devices.
- Developed Backend** with Role Based Authentication and Authorization using JWT for enhanced security and control.
- Debugging live applications using logging tools like Kibana and splunk and checking the workflow and process automation using Camunda Engine.
- Worked directly with the client in migrating pipelines from Jenkins to Azure DevOps.
